## ScriptCoach®

### Production-ready LotusScript library

- Code library of 100+ production-ready, fully-tested LotusScript functions
- Full working code examples demonstrating techniques in Domino, ODBC, file handling and other essential LotusScript concepts
- Detailed code walk-throughs and useful programming tips in every script
- The ability to cut and paste re-usable scripts into your databases
- Manage the various versions/modifications to scripts in the ScriptControl Library
- Script repository encourages code sharing and collaboration

The ScriptCoach is a code library that contains a comprehensive library of 100 plus production ready, reusable and fully tested LotusScript functions and examples. The ScriptCoach caters to both expert and beginning Lotus Notes developers. For the expert, ScriptCoach offers a library of reusable LotusScript functions that will save time when developing Lotus Notes database or Domino applications. These functions have already been written and tested for the production environment. For the beginner, ScriptCoach offers several resources to get up to speed on the LotusScript language quickly. Every script in the ScriptCoach has a Script Walk-through section that explains how the code works line by line. The extensive Examples section demonstrates important LotusScript concepts, such as error handling, to help the beginning LotusScript programmer learn LotusScript faster and easier.

### Over 100 reusable functions and code examples

- Prevent the “reinventing the wheel” syndrome
- Reduce the cost of implementing and developing Notes/Domino applications
- Shorten the LotusScript learning curve for developers
- Increase the return on your investment in application development by sharing existing knowledge

Developers will save considerable time developing Domino applications with ScriptCoach because they are reusing code that already works. By simply using the “Copy Script” button, these pre-tested scripts can be inserted into LotusScript agents. ScriptCoach improves efficiency in LotusScript programming and teaches good programming style. ScriptCoach promotes collaboration within a development team by providing a vehicle for which knowledge can be shared and leveraged. Through collaboration and code-sharing, the same scripts can be used over and over again, saving time. It not only preserves the intellectual capital invested in the development of Notes/Domino applications, it is also an excellent training tool for learning Notes classes.
